

Factors Driving Short-Term Rental Review Sentiment Across Price Ranges

The Predictive Pioneers (group 2): Christine Tsai, Ben Harris, Vance Newsome (leader)

DS 4002: Data Science Project Course, 02/07/25

Data Appendix

Airbnb Dataset: each observation in this dataset represents a customer review of an Airbnb property in one of the 17 cities we analyzed. We took a random sample of reviews from each city, resulting in 12661 total observations.

Variables:

- **listing_id:** a unique identifier for each Airbnb property listing (integer).
 - Constructed from `id` variable in raw listings data
 - No missing observations
- **review_id:** a unique identifier for each customer review (integer).
 - Constructed from `id` variable in raw reviews data
 - No missing observations
- **comments:** the text of a review left after the customer's stay (text).
 - From review data
 - No missing observations
- **price:** the cost per night of the Airbnb property in United States Dollars (integer).
 - From listing data, cleaned to remove dollar signs and commas
 - No missing observations
 - Summary statistics:
 - Minimum: 10
 - 1st Quartile: 88
 - Median: 120
 - Mean: 158.2
 - 3rd Quartile: 175
 - Maximum: 10000
- **city:** in which city the Airbnb property is located. There are 17 possible cities (text).
 - Created for each batch of data by location
 - No missing observations

City:	Washington_DC	Twin_Cities	Seattle	San_Francisco
Frequency:	600	600	600	600

City:	San_Diego	Portland	NewYorkCity	NewOrleans
Frequency:	600	2018	751	736

City:	Nashville	LosAngeles	FortWorth	Denver
Frequency:	1440	457	664	355

City:	Dallas	Clark_co	Chicago	Boston	Austin
Frequency:	390	881	711	263	1000

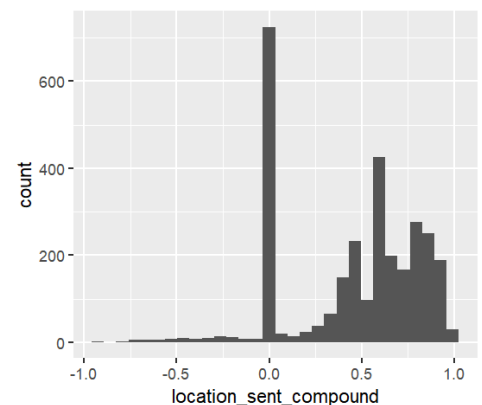

- cleanliness: a binary variable with value 1 for observations in which `cleanliness_sent_compound` has a value and 0 in which `cleanliness_sent_compound` is "NA".
 - Created from `cleanliness_sent_compound`
 - No missing observations
- safety: a binary variable with value 1 for observations in which `safety_sent_compound` has a value and 0 in which `safety_sent_compound` is "NA".
 - Created from `safety_sent_compound`
 - No missing observations
- location: a binary variable with value 1 for observations in which `location_sent_compound` has a value and 0 in which `location_sent_compound` is "NA".
 - Created from `location_sent_compound`
 - No missing observations

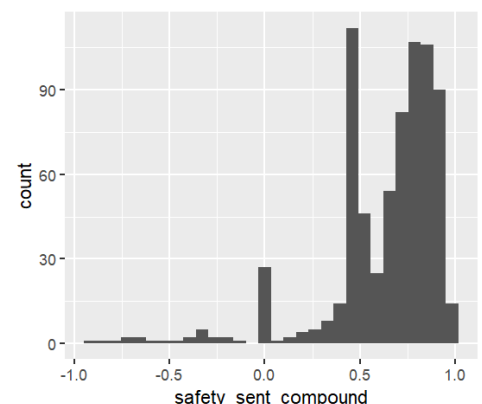

- cleanliness_sent_compound: the normalized, weighted sum of the sentiment scores of words in reviews related to cleanliness of the Airbnb property. A score above 0 indicates positive sentiment and below 0 indicates negative sentiment.
 - Created with VADER package, based on the `comments` variable
 - Observations: 12661(8823)
 - Summary statistics:
 - Minimum: -0.920
 - 1st Quartile: 0.458
 - Median: 0.743
 - Mean: 0.661
 - 3rd Quartile: 0.848
 - Maximum: 0.992

- location_sent_compound: the normalized, weighted sum of the sentiment scores of words in reviews related to location of the Airbnb property. A score above 0 indicates positive sentiment and below 0 indicates negative sentiment.
 - Created with VADER package, based on the `comments` variable
 - Observations: 12661(9670)
 - Summary statistics:
 - Minimum: -0.928
 - 1st Quartile: 0.000
 - Median: 0.572
 - Mean: 0.460
 - 3rd Quartile: 0.758
 - Maximum: 0.991

- safety_sent_compound: the normalized, weighted sum of the sentiment scores of words in reviews related to safety of the Airbnb property. A score above 0 indicates positive sentiment and below 0 indicates negative sentiment.
 - Created with VADER package, based on the `comments` variable
 - Observations: 12661(11947)
 - Summary statistics:

- Minimum: -0.915
- 1st Quartile: 0.482
- Median: 0.710
- Mean: 0.632
- 3rd Quartile: 0.840
- Maximum: 0.990

- overall_sent_compound: the normalized, weighted sum of the sentiment scores of words in reviews of the Airbnb property. A score above 0 indicates positive sentiment and below 0 indicates negative sentiment.

- Created with VADER package, based on the `comments` variable
- Observations: 12661(0)
- Summary statistics:
 - Minimum: -0.9912
 - 1st Quartile: 0.7767
 - Median: 0.9059
 - Mean: 0.8010
 - 3rd Quartile: 0.9587
 - Maximum: 0.9995
